

Karen A. Gordon, PhD, CCC-A, Reg. CASLPO

Archie's Cochlear Implant Laboratory, The Hospital for Sick Children, Department of Otolaryngology-Head & Neck Surgery, University of Toronto

Title: Senior Scientist, Professor

Education/Training:

PhD in auditory neuroscience, University of Toronto
MA in Audiology, Northwestern University

Prior service to ARO:

2019-2022; ARO program committee

Research Interests:

Developmental plasticity of the auditory and vestibular systems; bilateral and asymmetric hearing loss; binaural/spatial hearing; electrophysiological measures

Clinical Interests:

Developmental outcomes in children with hearing and balance impairments; cochlear implantation and bimodal device use in children; early identification and treatment of paediatric hearing/vestibular loss

Personal interests:

Exploring the world, spending time at home with family and friends

Statement of Goals:

I am honoured to have been nominated for the position of ARO Council Member at Large. I have been a member of ARO for 15 years and have served on the ARO program committee. I enjoy attending the ARO conference with our research team of students and staff. Through ARO, we access novel and innovative work and receive invaluable feedback on our research in a wonderfully rich, supportive, and collaborative environment. As a member of the ARO Council, I'd like to help ARO continue to meet these high standards.
